## Work Experience

*Summer 2019*

*GoDaddy*

Product Management Intern

- Inspired and led our team's first design sprint, resulting in multiple tested prototypes & material in C-level decks
- Uncovered insights with SQL, PySpark to highlight opportunities for software/policy improvement

*Fall 2018*

*Dietrich College*

Teaching Assistant: Database Design & Development

- Advised students in designing & developing a database (modeled after Snapchat) from start to finish
- Exercised and explained my knowledge of database design, as well as SQL, Redis, and Mongo languages

## Projects

Application Design and Development Project

- Built a web application from the ground up using Ruby on Rails, git source code management, and VueJS
- Followed MVC model, as well as design principles such as reduced memory load

Quaker Valley COG Consulting Project

- Managed, developed, and conducted user research for an ArcGIS web application
- Employed agile & process consulting methodologies to expand client's capacity in making data-driven legislation

## Extracurricular Positions

*Spring 2017 - Now*

Educational Technology Club President

- Built and served as webmaster of the club's website, seen here: [cmuedtech.org](http://cmuedtech.org)
- Hosted the club's very first successful educational-themed hackathon, with over 30 participants and sponsorships from Google and Schell Games

*Fall 2016 - Now*

PSALM - Peer Minister

- Hosted fellowship events at our center with an emphasis on welcoming all people, especially LGBTQ folks
- Organized service projects in which the community could participate in
